FLIR Cx5<sup>™</sup> Hazardous Location-Rated Thermal Camera

The FLIR Cx5 is a thermal camera made to provide safer inspections in hazardous locations. This thermal imager is certified for use in many explosive environments, eliminating the need to acquire hot work permits while making T-Class surveys quick and easy. The FLIR Cx5 is an affordable thermography tool for most industries with explosive atmospheres including chemical, oil and gas, and wastewater treatment facilities. The 3.5-inch touchscreen interface is simple to use, and the 160 × 120 thermal resolution gives you accurate temperature measurement of nearby targets. Built-in FLIR Ignite<sup>™</sup> cloud service provides direct data transfer, storage, and backup, so images are always available and easy to share. With the FLIR Cx5 in your toolbox, you'll always be ready to investigate mechanical and electrical equipment around your production site.

#### INSPECT SAFELY IN EXPLOSIVE ENVIRONMENTS

Improve plant performance in a safe and compliant manner in certain types of explosive environments

- Accurately measure temperatures of nearby targets with the 160 × 120 (19,200 pixels) thermal camera
- Instantly locate temperature issues and improve thermal image understanding with FLIR MSX<sup>®</sup>, which adds visible light details to thermal images and embosses them onto the full thermal image
- 1-Touch level/span saves time on manual thermal adjustments by modifying the level and span with a single touch

#### RUGGED, RELIABLE, AND CERTIFIED

The FLIR Cx5 Thermal Imaging Camera is proven to keep operators safe when inspecting their equipment and facility

- Conforms to restricted breathing and dust protection standards
- Eliminate the need for hot work permits in hazardous locations due to gas, vapor, and dust
- Carry the compact Cx5 in your pocket, keeping it out of your way while climbing access ladders
- See into dark, difficult-to-reach areas with the help of an LED worklight that is fully operational behind an impact-resistant lens

#### UPLOAD AND SHARE DATA INSTANTLY

Wirelessly upload and share data with colleagues to communicate potential issues faster

- Upload images directly to the FLIR Ignite<sup>™</sup> cloud to safely and securely store, transfer, and back-up images
- Synchronize the camera with FLIR Thermal Studio software for the most powerful thermography analysis and report generation capability
- Identify and describe potential issues by adding annotations to images and reports
